

Climate Energy Solutions ACHIEVES ISO 9001 REGISTRATION FROM THE BRITISH ASSESSMENT BUREAU

Essex based insulation and heating company, Climate Energy Solutions, has achieved the internationally recognised ISO9001, establishing it as one of the leaders in its field.

This independent assessment was conducted by the British Assessment Bureau, a leading Certification Body and demonstrates Climate Energy Solutions commitment to customer service and quality in delivery.

Climate Energy Solutions has now earned the right to display the coveted British Assessment Bureau Quality Shield and ISO9001 logo to demonstrate its conformance to the standard.

ISO 9001 was first introduced in 1987 and requires organisations to demonstrate that they do what they say they do and that they have a quality management system in place to ensure consistency and improvement; leading to high levels of performance and customer satisfaction. Certified organisations are committed to continuous improvement and are assessed annually to ensure progress is being maintained.

Climate Energy Solutions has shown that it has good product and service reliability and process controls which mean lower costs for its customers!

Phil McGrory, Managing Director of Climate Energy Solutions said, "We are particularly pleased to have achieved ISO9001 certification as it underlines our commitment to our customers and our focus on quality. Not many customers get to see their suppliers' 'back-office' activities. This recognition demonstrates we can provide a quality solution from quotation to delivery."

The benefits of registration to the ISO9001 standard include:-

- Streamlining an organisation's procedures.
- Bringing consistency to an organisation's service delivery.
- Reducing cost and rework.
- Improving an organisation's management practices.
- Enhanced status.
- Competitive advantage.
- Lower insurance premiums.

THE BRITISH ASSESSMENT BUREAU

Their reputation was established in 1969 as a specialist in certification scheme management. In 1997, the Secretary of State for Trade and Industry approved the use of the word 'British' in our corporate title in recognition of our pre-eminent status. Today, they certify organisations to recognised standards like ISO 9001 (quality management) and ISO 14001 (environmental management) as well as design and manage bespoke assessment schemes. Such schemes are based on the establishment of standards, which can be developed to be recognised company-wide, industry-wide, nationally or internationally.
