

Climate Energy Solutions receive accreditation for SAFE contractor.

Climate Energy Solutions received accreditation as a SAFE contractor this month, after undergoing a vetting process which examines health and safety procedures and their track record for safe practice.

The accreditation means that Climate Energy Solutions are added to a database accessible to registered companies looking for a potential contractor with sound health and safety policies.

SAFE contractor accreditation is expected to enhance the company's ability to attract new contracts and its commitment to safety will be viewed positively.

Phil McGrory Managing Director says "This will enable us to tender and work for larger companies that request this accreditation as standard, along with our CHAS accreditation (Contractors Health & Safety) and our ongoing commitment to Health & Safety we hope to be an example to other companies"
