## **Double success for Climate Energy Solutions at the National Insulation Association Awards**

Braintree based Climate Energy Solutions (CES) is celebrating after scooping a top prize at last night's National Insulation Association Awards.

The company, part of the Climate Energy Group, topped the category for Health and Safety Awareness, and was also awarded the second place spot in the category of Marketing Campaign of the Year.

Climate Energy Solutions achieved first place for Health and Safety Awareness after demonstrating a high level of staff training in health and safety, monitoring of health and safety procedures and implementing incentives to staff to take health and safety seriously.

It was awarded the runner-up spot in the category of Marketing Campaign of the Year thanks to the work it has done to promote the benefits of solid wall insulation to homeowners through various marketing promotions including television programmes, leaflets and magazine articles.

These awards come on the same month that the Climate Energy Group was presented with a bronze Green Apple award for Environmental Best Practice, and was ranked as the UK's Fastest Growing Larger Cleantech Company by GP Bullhound.

Phil McGrory, Managing Director of Climate Energy Solutions says:

*'We have always prided ourselves on having extremely high standards in everything we do, it's great to see all that hard work recognised by the National Insulation Association.'*

*"Our solid wall insulation campaign has been a great success, demonstrating the benefits of solid wall insulation and how quick and easy it is to install. The campaign is on-going, and we continue to produce updated material to support it."*

-Ends-

### **Notes to editors**

#### **About Climate Energy Solutions**

Climate Energy Solutions is a fully accredited company of qualified and experienced installers of energy efficiency measures including heating, insulation and renewable technologies.

Based in Braintree, Essex, Climate Energy Solutions has worked with business, homeowners, local authorities and registered housing providers across the UK to make properties more energy efficient.
